PROFESSIONAL EXPERIENCE

SCI Knowledge Interlinks Pvt. Ltd.

Bangalore

Full Time – Software Developer

November 2025 – Current

- Built and maintained event management web applications supporting registration, ticketing, and payment workflows for large-scale conferences and technology summits.
- Designed dynamic registration forms, managed SQL database structures, and implemented business logic for event-specific applications, ensuring efficient data storage, retrieval, and reporting.

DXC Technology

Bangalore

Apprenticeship – Software Developer

June 2025 – October 2025

- Developed and maintained robust backend services and RESTful APIs using Java and Spring Boot to support application features and business logic.
- Implemented data access layers using Spring Data JPA and native queries to interact with MySQL, handling all CRUD operations and complex data relationships.

Noventiq

Bangalore

Internship

Feb 2023 – Apr 2024

- Deployed and configured scalable and reliable cloud infrastructure solutions using Microsoft 365, GCP and Workspace services. Enabled migration tools with connectivity between source and destination tenant.
- Established, implemented, and monitored cloud policies for the allocation of resources.

TECHNICAL SKILLS

- Languages:** Java, SQL, Javascript, HTML, CSS.
- Framework/API:** J2EE, Spring MVC, Spring Boot, Hibernate, Servlets, JSP, RESTful APIs.
- Database:** Oracle, MySQL, JDBC, JPA.
- Cloud / Hosting:** Tomcat, Apache Server, Google Cloud Platform.
- Tools / IDE:** IntelliJ IDEA, Eclipse, Maven, Gradle, VS Code, MySQL Workbench, Git, Postman.

PROJECTS

Bengaluru Tech. Submit Project

Spring Boot, MySQL

- Designed and implemented dynamic registration forms and backend business logic, enabling seamless data collection and processing across multiple booking platforms while improving user experience and reducing manual data entry.
- Designed relational database schemas and collaborated with cross-functional teams throughout the development cycle including requirement analysis.

SusChemE 3.0 Project

Java, Spring Boot, JPA Library, Maven

- Collaborated in the development of enterprise event management solutions, supporting attendee registration, payment workflows, and event information portals.
- Implemented backend functionalities, managed relational databases, and integrated services to enable seamless communication between frontend interfaces and backend systems.
